2017 YEAR IN REVIEW

IP-PST2 Patient Station

The Tacera Patient Station (IP-PST2) is a wall or bedhead unit that provides a complete in-room patient call and audio solution. Multiple patient/resident handset sockets allow the patient station to support one or two beds per room. The device serves as an IPnet Room Controller supporting all current IPnet device types.

The IP-PST2 provides full duplex VoIP, simplified cabling, and its slim, unobtrusive style and design ensures maximum patient safety while maintaining Austco's unique style.

Reports and Dashboards 2.0

Reports and Dashboards is a powerful business intelligence tool that helps clinical leadership optimize costs and streamline workflows.

The solution ships with 9 widget types, each reporting on a different metric. 3 report types are available, each reporting different data sets, with robust filtering to focus on data. There are two deployment options, cloud-based and on-premise.

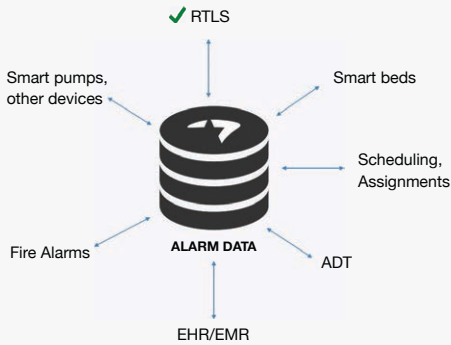

Global Partner Conference - Macau

Austco held "Collaborate for Success" in Macau from September 18 - 21, 2017. The 3-day conference provided partners with the opportunity to learn more about the latest Austco solutions, provide input into future developments, share successes and network with other Austco partners from around the globe.

Future Developments

WEB SERVICES

Part of our short-term plan is to enable additional integrations with more 3rd party systems. Facilities and technology partners want a standard interface with which to request alarm data. We are building web services to make for easy integration with Tacera. The goal is to integrate with additional systems such as, scheduling, smart medical devices, ADT, and EHR/EMR systems.

NEXT GENERATION CALL POINTS WITH WIRELESS

We have begun work on our next generation call points. Austco's 4G call points will have a fresh new look and feel, and will be coupled with RFID and Bluetooth which will allow them to display different content depending on who is in the room. 4G call points will be completely configurable to suit the unique requirements of each facility.

HIMSS18 ANNUAL EXHIBITION

CHECK OUT OUR NEW LOOK!
